**FOR IMMEDIATE RELEASE**

## **Landport: new lockbox prevents package theft from homes and businesses**

*Attractive design and durable construction provides safe haven for delivered parcels*

PORTLAND, Ore (July 1, 2014) – In the e-commerce age, having products delivered straight to the doorstep has changed how Americans shop, and along with that convenience comes worries about package theft. The new Landport is an attractive and sturdy lockbox that provides peace of mind for busy professionals, families and small business owners.

“In this new age of retail, the front porch is fast becoming a shipping and receiving platform. Landport sets the stage for secure, hassle-free pick-up and delivery.” said Portland Landport LLC founder Dr. Jody Pettit.

Both delivery personnel and home and business owners will find Landport easy to use. Each lockbox features an electronic keypad where the delivery driver enters the provided code to open the lid, places the packages inside, and closes the lid to automatically lock Landport. The heavy duty latch keeps contents secure until the home- or business-owner is ready to retrieve them.

Landport is available exclusively at [thelandport.com](http://thelandport.com) in three sizes:

- The Essential Cube: Its compact shape (17” x 17” x 17”) is well suited for areas with limited space and retails for \$499. Available in black, cream, and dark brown.
- The Essential Rectangle: Its versatile shape (17” x 17” x 34”) works well in horizontal areas and retails for \$599. Available in black, cream, and dark brown.
- The Deluxe Rectangle: The most elegant Landport features gently rounded corners and shoes, and stylish trim around the lid for \$799. The Deluxe is available in five colors: black, cream, dark brown, blue-gray, and red.

As much consideration was given to Landport’s construction as to its appearance: the lockbox is built to last for decades in an outdoor environment. Landport is made from the highest quality weather-resistant materials, including a 16-gauge steel body, and industrial-strength powder coating that resists rust while providing a beautiful, polished finish. Its solid construction, combined with its décor-friendly design and colors, makes Landport a useful and charming addition to any front porch.

### **About Portland Landport LLC**

Founded in 2014 by physician Jody Pettit, Portland Landport LLC launched its collection of designer lockboxes to solve the problem of package theft. To learn more about Landport, visit [thelandport.com](http://thelandport.com).
